Ultra Low-Power SoC Design System Platforms for Energy-Efficient Design

Our Expertise

Explore our advanced semiconductor IP solutions, expertly crafted into comprehensive design platforms. Engineered to enhance System-on-Chip (SoC) designs, our **Audio** and **Power Management** IPs deliver an unparalleled balance of energy efficiency and performance, exceptional audio quality, and seamless integration.

IP Portfolio

+ 300 IPs configurations available

Power Management

On-Chip Monitoring

Audio

Power Metering

Why Choose Dolphin Semiconductor

- Accelerate your Time-to-Money
- Mitigate your technical risks
- Focus on your core expertise
- Silicon proven IPs
- User friendly ecosystem
- In-house test / characterization Lab
- Our IPs use Dolphin Semiconductor's patented technology

Partnering with top silicon vendors including TSMC, GlobalFoundries, SMIC, and more
